PROJECTS

DabbeWale

Jul – Sep 2025

- Full-stack web platform connecting urban users with local home-cooked meal providers. Focused on accessibility, community support, and authentic nutrition at affordable pricing.

HealBuddy – Rule-Based Engine

Dec 2025 – Mar 2026

- Browser-based symptom checker using deterministic rule logic to map symptom patterns to common health conditions. Designed for general awareness, not clinical diagnosis.

HealBuddy – ML Edition

Jan – Mar 2026

- Multipage Streamlit app featuring three ML classification models (decision tree, random forest, SVM) with SHAP and LIME integration for local, interpretable predictions.

SipSentry

Nov 2025 – Jan 2026

- Progressive Web App delivering customizable hydration reminders via browser notifications. Installable, offline-capable, and lightweight — no native app required.

FollowTrack

Mar 2026

- Client-side Instagram follower analysis tool. Parses user-exported JSON data locally to identify non-followers, with zero server calls or third-party API dependencies.

Protekt

Mar 2026

- A web-based emergency safety system that provides quick access to essential helpline numbers and emergency support. It is designed to help users respond faster during critical situations through a simple, responsive, and user-friendly interface.
